MULTI ERGOTABLE

To obtain optimum results of rehabilitation proper working postures for user and therapist/helper are decisive. The Multi Ergotable is a height-adjustable working table with cut-outs in the front and back of the tabletop. The tabletop has cut off corners at the front. The two cutouts provide support for body and forearms. The working table is ideal for training situations where the user and therapist are sitting close together opposite to each other. Also wheelchair users may come close to the table, as it has no inconvenient braces. Because of the placing of the legs the table can also come close to the bed or couch. In training situations when the user and therapist are sitting close together on the same side of the table the cut-out provides support and the cut off corners provide more space for the therapist sitting beside the user.

The standard version of the Multi Ergotable comprises two boomerangs, which may be easily fitted in the cut-outs of the tabletop. Included is also a moon-shaped boomerang to be used when a cut-out is required on one side of the table only. Standard brake wheels ensure optimum stability and mobility of the table.

ST-TABLES

The flexible ST-tables take individual requirements as well as various applications regarding seated and/or standing work into consideration.

The tables have no inconvenient cross brace and therefore, they are very suitable for wheelchair users. In addition the tables are accessible from both sides.

The tables are infinitely adjustable in height. The adjustment is done with effortless ease by means of a detachable handle. The current height is shown on a scale on the telescopic legs. All of the tables are delivered with adjusting screws. The mounting of brake wheels will increase the height of the table by 8 or 9 cm.

The ST-tables are available with tabletops in various designs and can be equipped with accessories such as adjustable edge bar, supporting ruler, built-in steel-plate or an additional top with boomerang.

The tabletops are surfaced with a mat and non-reflecting laminate in beech finish, that enables weak-sighted persons to distinguish objects on the tables. The colour of the frame is white. The frame and the tabletop only need minimal maintenance.

ERGOTABLE ST

The Ergotable ST is available in three heights, and in measurements of 90x60 cm, 120x60 cm and 90x90 cm. The tabletops B, C, D, E can be tilted stepwise up to 54°. If a tilt function up to 74° is required, see accessories Art. No.20-16510.

BOOMERANG SYSTEM

As a standard the ST-additional tops with cut-out are delivered with a Boomerang size Ø40 cm. The size of the cut-out can be changed by means of Boomerangs in different diameters. Just loosen four screws, pull the Boomerang out of the cut-out, push in another Boomerang and retighten the four screws. A half-moon Boomerang is also available to obtain a straight front edge of the table.

The Boomerangs are mounted with four thumb screws.

COLUMN TABLE ST

The Column table ST with or without rotation is a flexible model that accommodates to various applications and demands. A wheel has been integrated into one of the feet, so that the table can quickly and easily be moved.

As an accessory equipment a friction handle is available. The handle protects cogwheels, etc. from being damaged at violent use.
