Mobil Flex 
R A N G E

Height Adjustable Baths

EBB-5

Mobil Flex baths are infinitely adjustable in height between 65 and 95cm by means of a simple push button hand control. This adjustment facilitates easy transfer for the user and a safe and comfortable working level for the carer.

Available in lengths from 140 - 190cm (in 10cm increments), the bath can easily be installed in lieu of a standard bath, making it ideal for domestic use as well as nursing environments.

Each bath is supplied with an anti-scald mixer tap and hand held shower attachment as standard. A flexible plumbing kit is also included.

As the bathtub is made from enamelled steel, bathing aids such as bathboards, bathseats and other inserts can be added without fear of damage to the bath as in acrylic versions.

The design of the adjustable bath frame allows unrestricted approach by mobile patient lifters.

The EBB-5 model includes a fold down shower bench/stretcher which moves up and down with the bath. Quick drying stretcher material means that the bench can be used as a drying area following bathing or showering. The stretcher cover is removable for cleaning and maintenance.

Gas cells assist the raising and lowering of the bench.

Optional accessories for Mobil Flex baths include a fold down cotside/guardrail and a bath mounted support fixture for shower attachment.

All electrical components are rated IP66

Height Adjustable Washbasins

HL-1

The HL-1 has hydraulic stepless adjustment within a 32cm range. Operation is by a lever handle which can be placed on either the left or right hand side. Available complete with sink, tap and flexible plumbing kit or as frame only.

HL-2

This versatile washbasin lift can be supplied in either a manual (HL-2M), hydraulic (HL-2H) or electric (HL-2E) version.

The manual option (not for daily height adjustment) can be varied by 25cm. The hydraulic and electric versions provide stepless and instant adjustment of 30cm.

HL-2 wash basins can be mounted on a horizontal track system which allows them to be moved from side to side, thus making the wash/bathroom layout completely flexible.

HS-2

A stylish washbasin which is electrically operated (24v) and has an infinite adjustment of 6.5 - 9.5cm.

Services and framework are concealed behind a moulded PVC housing.

The HS-2 is supplied complete with anti-scald tap, washbasin and flexible plumbing kit. Options include an ergonomic washbasin (in lieu of the standard basin), extended lever tap, sensor tap, infra red hand held control and left or right hand mounted control switch.

HS-3

An electrically operated vanity style washbasin with stepless adjustment of 6 - 10cm. Supplied complete with anti-scald monobloc tap, shelf, mirror and flexible plumbing kit. A safety stop is incorporated which prevents accidental trapping.

Options include an ergonomic washbasin with or without tilt function (in lieu of the standard basin), extended lever tap and sensor tap.

All electrical components are rated IP66

HL-1, 32cm

HL-2, 25cm - 30cm

HS-2

HS-3

HS-4

HS-4

A complete vanity solution which is available in both left and right handed models. With electrical (24v) height adjustment of 6 - 10cm, the HS-4 is supplied complete with integral washbasin, anti-scald monobloc tap, cupboard, mirror and flexible plumbing kit. Safety stop included.

Options include extended lever tap and sensor tap.

(N.B. The HS-3 and HS-4 are not supplied with light strips which should be purchased locally.)

HS-4

Height Adjustable Shower Benches

BLE-S

BLE-S

This wall mounted shower bench has stepless height adjustment within the range 30 - 100cm ensuring a safe transfer for both ambulant and wheelchair users. The carer will benefit from being able to work at a secure and comfortable level and the requirement for lifting is minimal.

Operated by a simple push button hand control the bench is powered by a safe, quiet and reliable 24v motor.

Water collects and drains through a standard plug hole and quick drying nylon netting covers the stretcher. This allows the bench to be used for both showering and changing.

When not in use the BLE-S can be folded against the wall freeing space in the shower room and allowing ambulant showering by other users. The folding mechanism is assisted by gas cells.

Available in lengths from 110 - 180cm (in 10cm intervals) the bench can also be supplied with a fold down guard rail and a mattress.

SSB

Electrically powered by a safe, quiet and reliable 24v motor the SSB has a height adjustment of 70cm (30 - 100cm range).

The bench has been designed with no cold surfaces and polyurethane foam covers the stretcher, guard rail and end caps. This combined with a curved design provides unprecedented comfort for the user.

A manually adjustable backrest is built in providing additional comfort for those who cannot be showered/changed in a fully reclined position. This backrest is reversible so that the bench does not have to be ordered left or right hand.

The unique folding mechanism is assisted in both directions using gas cells. This means that the bench is easy to fold away and will not fall unexpectedly.

An integral drainage system collects the water thus minimising splashing on the carer or floor. The flexible waste pipe can be connected to a wall or floor drain.

Available in two lengths, 130 and 180cm (SSB-13 and SSB-18) the bench can also be supplied in a fixed height version (SSB-13F and SSB-18F). All benches have the option of a fold down guard rail which can be operated by one hand

SSB

All electrical components are rated IP66

The Hygiene Room

When the upstairs bathroom becomes inaccessible or an existing bathroom requires adaptation the Hygiene Room provides the ideal solution.

The waste system allows the cubicle to be installed almost anywhere (space permitting) as waste can be pumped 3 metres vertically and 30 metres laterally. This means that an easy installation can be made in a bedroom, lounge or even a basement setting.

The Hygiene Room is available in three versions:

- KHo80 Hygiene Room with shower
- KHo90 Hygiene Room with shower and washbasin
- KHo100 Hygiene Room with shower, washbasin and toilet

Each cubicle has a non-slip patterned floor which is durable enough to accommodate mobile shower chairs.

Both white and transparent wall options are available with swinging or folding doors. Window walls can also be incorporated.

Optional accessories include ramp, mirror cupboard, shelf for toiletries, half height curtain, folding shower seat and shower mixers.

Dimensions (cm):

Overall: 212 (h) x 170 (w) x 119 (d)

Interior: 212 (h) x 123 (w) x 93 (d)

Maximum user weight is 150kg.

Height Adjustable Nursing Tables

EF-2

EF

A freestanding nursing table which does not require fixing back to the wall. This is useful if the wall concerned is not load bearing or the table is required to be moved from room to room.

Electrically powered by means of a 24v motor EF nursing tables have a height adjustment of 65 - 100cm.

Each table is supplied with two pullout baskets for the easy storage of towels, nappies, etc.

Optional accessories include a collapsible guard rail (SR-1) and mattresses in either red, white or blue colour.

Standard sizes are 80 x 90cm (EF-1), 80 x 140cm (EF-2) and 80 x 180cm (EF-3).

This nursing table is also available in a wall mounted version (EV).

EFS

As the EF model but supplied with a stainless steel sink, anti-scald mixer tap, hand shower and flexible feed & waste system.

Standard sizes are 80 x 140cm (EV-2) and 80 x 180cm (EV-3).

A wall mounted version is also available (EVS).

EVS-1

All electrical components are rated IP66

EVO-2

EVO

The EVO is an electrically powered wall mounted nursing table which has a folding top making it ideal where space is at a premium.

Standard sizes are 80 x 90cm (EVO-1), 80 x 140cm (EVO-2) and 80 x 180cm (EVO-3).

Mattresses are available in either red, white or blue colours.

Steps can assist the transfer on to the nursing tables and these are available as follows:

TS-1 1 narrow step

TS-2 2 narrow steps

TS-3 3 narrow steps

TB-1 1 wide step

TB-2 2 wide steps

TB-3 3 wide steps

Steps are manufactured from quality beech wood and coated with a resilient matt lacquer. Framework is white EPC steel.

Low Start Height Nursing Tables

Low start height nursing tables enable the user and carer to select an optimum level for the transfer of both ambulant and wheelchair users as well as selecting a comfortable and secure nursing height.

These tables have stepless height adjustment within the range 30 - 100cm. Heavy lifting is therefore minimal.

Each model has a PVC backboard which conceals the motor and height adjustable framework and operation is by means of a simple push button hand held control.

ELO-2

ELO

A folding wall mounted nursing table which frees space in the room when not in use.

The ELO is available in the following sizes: 80 x 90cm (ELO-1), 80 x 140cm (ELO-2) and 80 x 180cm (ELO-3).

Optional accessories include a folding guard rail (SR-2) and mattresses in either red, white or blue colour.

ELS

The ELS is supplied complete with stainless steel sink, anti scald mixer tap, hand shower and flexible feed and waste kit system.

A safety stop system is incorporated should the table meet an obstruction and an anti trapping device protects the user between the table top and back panel.

Two sizes are available: 80 x 140cm (ELS-1) and 80 x 180cm (ELS-2)

A version of this nursing table without sink, tap and plumbing system is also available in the sizes 80 x 140cm (EL-1) and 80 x 180cm (EL-2).
