

Flexi washbasin

The new height-adjustable washbasin Flexi is not only a valuable help in everyday life - it is also elegant!

Wheelchair users have unimpeded space up to the wall for better access.

The Flexi washbasin is manually or electrically height-adjustable from 68-98cm.

Easy and frequent height adjustment can be made using the electric version. The "wind up" manual version requires average dexterity and strength to adjust the height.

As Flexi is a modular system the manual version may be easily converted into an electrical version to meet changing needs.

Elegant covers hiding the height-adjustable legs are available on request in any RAL colour to match or contrast with the wall.

Manual height adjustment

- 40-14710 **Flexi** with 120cm washbasin in the middle
- 40-14711 **Flexi** with 90cm washbasin on the right side
- 40-14712 **Flexi** with 90cm washbasin on the left side

Electrical height adjustment

- 40-14715 **Flexi** with 120cm washbasin in the middle
- 40-14716 **Flexi** with 90cm washbasin on the right side
- 40-14717 **Flexi** with 90cm washbasin on the left side

The products listed above include washbasin, tap and plumbing kit.

Accessories: Infra-red hand control, press pad (14x7cm), covers, safety stop and extended lever for mixer tap.

To eliminate the risk of trapping a person's legs, Ropox always recommends the use of safety stops for electrically operated frames.
